

Technical Information

hebro[®]doxin

Novel heavy-duty softening and cleaning agent

- Is an effective heavy-duty softening and cleaning agent which is equipped with emulsifiers, surfactants-, corrosion protection agents and inhibitors and is based on the concurrence of organic and inorganic acids.
- Dissolves effectively calciferous sedimentations, rust, cement and concrete residues as well as fat and oil contaminations of concrete or floor surfaces (not suitable for acid sensitive surfaces such as marble).
- Is diluted with water up to 1:10 due to the contamination. Can be sprayed, applied with a brush or used by dipping. Then rinse the cleaned surfaces or particles with water.
- hebro[®]doxin does not foam.

hebro[®]doxin offers the following advantages

Economical	a fast and problem free cleaning reduces downtimes and labour costs
Cost-effective	high economy through low required quantities. In case of regular use of hebro [®] doxin expensive and complex maintenance work can be reduced.
Fire-proof	no fire and accident risk
Effectiveness	free of lime and clean pipings increase the productiveness and reduce the rejections

Ingredients according to the EC-directive No. 648/2004:

Phosphates (15 % up to 30 %)
