

Technical Information

hebro[®]protect 7-3

Corrosion protection for all metals

hebro[®]protect 7-3

- is an universally applicable corrosion protection product
- is highly viscous.
- forms a white, wax-hard protective film.
- is water resistant.
- is ready for use and simple to remove, e. g. with **hebro[®]sol**-types (such us **hebro[®]sol 75**, **hebro[®]sol 30** ...).
- is easy to handle.
- is free of barium compound, therefore enhanced safety at work for the user.

Operational areas:

- Machines and components for the external storage, also with unfavourable conditions
- to the central to long-term protection during the interior and external storage

Application:

hebro[®]protect 7-3 is through sprays, dips or paints orderable. The film staying protects reliably against corrosion and is easy to remove if necessary.

Technical Data:

Protective film:	hard, wax like
Flash point:	30°C
Colour:	white
VbF-class:	A II
Layer weight:	3 g/m ²
Density:	0.78 g/cm ³
Water hazard class	1
Kesternich:	> 75 days
Salt spray test:	48 R5
