

Technical Information

■ hebro[®]protect 48-78

Product

hebro[®]protect 48-78 is a corrosion protection for all metals.

Characteristics

hebro[®]protect 48-78 is a corrosion protection product with low viscosity which is universally applicable.

hebro[®]protect 48-78 forms a brown, oily protective film which does not resinify.

hebro[®]protect 48-78 is easy to handle, ready to use and easy to remove, e.g. with hebro[®]sol-types or a water-soluble hebro[®]lan.

hebro[®]protect 48-78 is free from barium compounds and therefore improves the occupational safety.

Advantages

hebro[®]protect 48-78 is a highly effective corrosion protection product which is ready to use and easy to apply. Therefore you save time during processing and protect components or constructions against economic damage caused by rust.

hebro[®]protect 48-78 is characterized by its very good short-term corrosion protection properties.

hebro[®]protect 48-78 is completely free from barium compounds. Therefore it helps to improve the occupational safety.

Application area

hebro®protect 48-78 is wherever a short-term corrosion protection even under adverse conditions is required, e.g. for tools, semi-finished products and interim storage of parts.

Dosage

Spray, dip and paint application is possible. The remaining film protects against corrosion and is easy to remove.

Technical data

appearance: yellow-brown water solubility: insoluble
odor: characteristic protective film: oily

Disposal

Empty containers may simply be disposed of by our Interseroh System.
