

Technical Information

■ hebro[®]protect SGL 1

Product

hebro[®]protect SGL 1 is a corrosion protection for all metals.

Characteristics

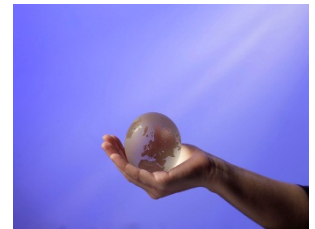

hebro[®]protect SGL 1 is a corrosion protection product with low viscosity which is universally applicable.

hebro[®]protect SGL 1 shows very good penetrating properties.

hebro[®]protect SGL 1 forms a brown, oily protective film which does not resinify.

hebro[®]protect SGL 1 is water displacing, ready to use and easy to remove, e.g. with hebro[®]sol-types or a water-soluble hebro[®]lan.

hebro[®]protect SGL 1 is free from acids, resins and barium compounds and therefore improves the occupational safety.

Advantages

hebro[®]protect SGL 1 is a highly effective corrosion protection product which is ready to use and easy to apply. Therefore you save time during processing and protect components or constructions against economic damage caused by rust.

hebro[®]protect SGL 1 is characterized by its very good short-term corrosion protection properties.

hebro[®]protect SGL 1 is completely free from acids, resins and barium compounds. Therefore it helps to improve the occupational safety.

Technical Information

2

Application area

hebro®protect SGL 1 is wherever a short-term corrosion protection even under adverse conditions is required (e.g. preservation of machines for transportation, intermediate preservation of semi-finished products, preservation of rolls, gearboxes, gears or for protection of stainless steels against fingerprints and water marks).

Dosage

Spray, dip and paint application is possible. The remaining film protects against corrosion and is easy to remove.

Technical data

appearance: yellow-brown water solubility: insoluble
odor: mild protective film: oily

Disposal

Empty containers may simply be disposed of by our Interseroh System.
