

## Technical Information

### Lanolid Paste

#### Eudermic, pasty handcleaner

- highly concentrated product with greasy properties.
- effects that the skin stays ductile and cannot leached out due to high contents of lanoline.
- contains no rubbing sand and no sawdust. The rubbing medium is lighter than water so that drains stay clean.
- remove strongest oil- and grease contaminations.
- avoids chapped and brittle hands. The possibility of an infection is reduced significantly.

#### Lanolid Paste offers the following advantages:

<b>Economical</b>	High economical efficiency due to low dosage of product.
<b>User-friendly</b>	No chapped and brittle hands. Remove strongest oil- and grease contaminations. Smells good and pH-value is neutral. The natural acid protection of the skin stays.

**Environmentally friendly and dermatologically safe.**
