

## Technical Information

### ■ derma fluid plus

## Concentrated double-action washing agent for hand-cleaning and decontamination

**derma fluid plus** is a light but effective after-work washing agent, which is easily absorbed to protect and care for the skin.

**derma fluid plus** cleans and decontaminates in one process. The product is free from perfume, preservatives and dyes.

**derma fluid plus** contains a unique blend of premium quality active ingredients, which work effectively against bacteria's, yeasts and fungi.

**derma fluid plus** is integrated about the BGR of Germany (Berufsgenossenschaftliche Richtlinien) and working place regulations of the German authority (§ 35.4) in the hygienic skin-protection-plan.

**derma fluid plus** is economical to use

### **derma fluid plus offers the following advantages:**

<b>Cost</b>	High economic efficiency due to low dosage of product.
<b>Effective</b>	Cleaning and decontamination in one process.
<b>Economic</b>	Only a few ml being enough to clean the hands thoroughly

### Usage

For all HACCP-guideline defined working places, e.g. food industries, kitchens, canteens, hotels and restaurants, service areas, catering services, old people homes and care institutions etc.

### Application

Rub a little **derma fluid plus** (ca. 3 ml) into dry hands for minimum ½ minute, add a little water and wash thoroughly. To dry the hands you should appropriately use hygienic disposable towels to reduce the possibility of re-contamination.
