

Technical Information

hebro[®]flock 2005

Powder flocculant

hebro[®]flock 2005 is a highly effective, powder flocculant for flocculation of waste water containing glue and paint.

Properties

hebro[®]flock 2005 cleans a range of different waste water types through adsorptive flocculation; it also binds existing solvents and flocculates them.

Technical specifications (typical values)

Concentrate

Appearance/colour	pH value at 20°C	Bulk density
Powder / natural colour	7.5 (20°C) Concentration: 10 g/L	810 kg/m ³

The dosage of hebro[®]flock 2005 for waste water treatment depends on the amount and type of dirt and can only be determined by means of tests. After a reaction time, in which coagulation and flocculation takes place, a good separation into clear water and sediment takes place. A flocculant aid may be additionally required to form macro-flocs.

Information

No decomposition when stored and used as directed. No specific storage conditions required. Protect from moisture. Store in a dry place. Store in the original container.
